

EVOLVE24, LLC

Job Title: Research Scientist – Statistics/Econometrics

SUMMARY:

evolve24, LLC, Research Department seeks candidates for a Research Scientist position in Applied Statistics or fields emphasizing statistical applications in the cognitive and behavioral sciences. Our search is focused on candidates with research interest in and experience with applications in psychology, psychometrics, demography and/or geography. Ideal candidates will have a Ph.D., an excellent methodological foundation (e.g. expertise in linear regression, logistic regression, decision trees, cluster analysis, etc.), applied interests relevant to evolve24 applications, expertise with statistical software (e.g. SAS, SPSS, etc.), and excellent written and oral communication skills. Ideal candidates will enjoy working in a dynamic, team-based environment spanning fields in information, cognitive, and social sciences.

RESPONSIBILITIES AND DUTIES include:

- research on the role of language and culture in belief formation.
- research on the validity of evolve24 algorithms on reputation, risk identification, and choice under uncertainty.
- research on topical applications of interest.
- product improvement and new product development through participation on interdisciplinary teams.
- education and quality assurance through classroom instruction to staff research associates engaged in client directed research and developing automated methods for client research project quality analysis.
- participation on client research teams, including participation in client engagements and meetings to brief clients on key findings of research.

Academic collaborations are encouraged and supported.

Applicants should send a statement of research interests, curriculum vitae, and a writing sample(s) (current and/or forthcoming) and arrange to have three letters of recommendation sent to evolve24, LLC, attn. Research Statistician/Econometrician Search, 12444 Powerscourt Drive, Suite 160, St. Louis MO 63131.
